

Theorema 2.0: A First Tour

NB reached List reached2 CellGroupData reached List reached2 NullCell
reached egingroup

We consider “proving”, “computing”, and “solving” as the three basic mathematical activities.

CellGroupData reached List reached2 Cell reached egingroup

We want to prove

Cell reached egingroup

To prove a formula like the above, we need to enter it in the context of a Theorema environment.

Cell reached CellGroupData reached List reached2 Cell reached Cell reached
Cell reached Cell reached CellGroupData reached List reached2 Cell reached
Cell reached Cell reached Cell reached Cell reached Cell reached Cell reached
Cell reached Cell reached Cell reached Cell reached CellGroupData reached
